SCHEDULE 2

LISTING BY PATTERN NUMBER

Pattern numbers designated with an asterisk on Schedule 1 indicate Shelley oftentimes assigned multiple pattern numbers for the same "pattern" to designate pattern applications to various shapes across the full Shelley line and/or other pattern application variables e.g. background colors or trim variations. This in effect renders identification of Wileman/Shelley miniatures by a single pattern number not possible in most cases. Pattern numbers not designated with an asterisk were assigned & appear only on miniatures. Schedule 2 is therefore presented only as an aid in cross referencing pattern numbers listed alphabetically in Schedule 1 with pattern numbers as follows in ascending numerical sequence.
